

## SUMMARY

Technical leader with expertise building full-stack enterprise & e-commerce web experiences, back-end services and event systems; migrating legacy architectures to modern technologies; and empowering teams of knowledge workers to succeed autonomously.

## EXPERIENCE

- Mar 2019  
to Present
- Shutterstock** | Senior Engineering Manager | *Enterprise, Small & Medium Business (Teams), Localization*
- Provide technical leadership, career development, and oversight to three teams of globally distributed developers
  - Technical owner of the \$243MM/year Enterprise & SMB products, web apps, APIs, data services, and event pipelines
  - Technical owner of the Localization system, powering human and machine translation of the site into 21 languages
  - Stabilized a stalled cross-functional company initiative by organizing dependencies and stakeholders across the organization to identify a path forward by assigning ownership and providing architectural guidance
  - Architect for the Machine Translation Service, integrating the Localization system and content ingestion pipeline
- Aug 2016  
to Feb 2019
- Shutterstock** | Engineering Manager | *Small & Medium Business (Teams)*
- Provided technical leadership, career development, and oversight to a team of globally distributed developers
  - Technical owner of the \$91MM/year SMB products, front-end UX, APIs, data services, and legacy enterprise web app
  - Domain expert and decision maker for migrating a legacy monolith to microservices and a React framework
  - Supported the broader organization via cultural initiatives, crafting architectural guidelines, growing employee engagement, and administering our tech leadership meeting
- Jun 2014  
to Jul 2016
- Shutterstock** | Software Engineer | *Revenue, Workflow*
- Led development of a front-end UX and data migration from a legacy monolith to a data service and MVC app
  - Designed and led development of a RESTful API microservice in Node.js and MySQL
  - Established myself as domain expert on multiple key technologies, providing guidance to tech and product
- Feb 2013  
to Mar 2014
- Zerista** | Ruby on Rails Developer
- Maintained and extended a templated Rails web application, uniquely customized for dozens of clients
- Jun 2011  
to Dec 2012
- Enodia Financial Technologies** | Java Developer
- Developed real-time, financial transaction regulatory reporting software using FIX & FpML

## SKILLS

**Leadership** • SDLC • Project Management • Agile • Mentorship • Evangelization • Team Building • Hiring  
**Technical** • RESTful Microservices • Data Services • Event Systems • Cloud Computing • Full-stack Web Development

## EDUCATION

**BS Computer Science** University of Colorado, Denver
